ADDITIONAL CONDITIONS:

1. Scope of Supply – 3000 Litre Water Tanker

The scope of supply includes the design, fabrication, testing, and supply of one (01) water tanker of 3000 litres capacity, complete in all respects, along with the following:

1. Heavy-duty Mild Steel (MS) water tank of cylindrical or elliptical shape with suitable internal stiffeners and end-caps, designed for a total capacity of 3000 litres (approx.).
2. MS frame and chassis fabricated from structural sections (channels/angles) of adequate thickness for stable load bearing during movement.
3. Inlet and outlet valves of appropriate size with threaded couplings, along with pressure vent and drainage system ensuring complete discharge of water.
4. Leak-proof welding throughout the tank body, with reinforced joints and corrosion-resistant treatment both internally and externally.
5. Manhole with cover for inspection, cleaning, and maintenance purposes.
6. Mounting arrangement compatible with a 45 HP tractor, including towing hook, drawbar, and balanced weight distribution for safe operation.
7. External coating using anti-corrosive epoxy paint or powder coating in institute-approved colour for long-term rust protection.
8. Support stands and baffles inside the tank (if applicable) to reduce water surge and improve towing stability.
9. Tool kit and accessories (e.g., spanner set, grease nipples, hose pipe coupling, and towing pin) to be supplied with the unit (if supplied with the equipment).

Note: The entire unit shall be delivered in ready-to-use condition, ensuring full compatibility with the Institute's tractor and suitability for watering horticulture areas, cleaning works, and other campus utility applications.

2. Technical Specifications

1. The water tanker should have a minimum capacity of 3000 litres (approx.).
2. The unit should be rugged, durable, easy to maneuver, and require low maintenance.
3. All joints/welds must be leak-proof and corrosion-resistant.
4. The tanker must be equipped with:
 - Inlet and outlet valves
 - Pressure vents
 - Proper drain system ensuring complete discharge
5. The tanker should have anti-corrosive epoxy paint or powder-coated finish for long-term protection against rust and corrosion.
6. It should be mounted on a suitable MS frame with towing arrangement compatible with tractor attachment.
7. The design must ensure optimum weight distribution for easy movement and stability during towing.

3. Documents to be Submitted Along with Quotation

Suppliers are requested to submit the following documents along with their quotation:

1. Detailed technical datasheet of the offered water tanker (3000 Ltrs).
2. General arrangement drawing (GAD) / dimensional drawing with specifications and key design parameters.
3. Copy of GST registration certificate and PAN card.
4. Past performance / client list of similar supply (if any).
5. Warranty declaration and compliance sheet against specifications mentioned above.

4. General Instructions

- The supplier must comply with Central Government Procurement Rules (GFR-2017) and all applicable standards.
- Prices must be quoted in Indian Rupees (INR) only.
- The Institute reserves the right to accept or reject any or all quotations without assigning any reason.
- The lowest quotation will be evaluated on total landed cost basis including all applicable charges.
